STEP 4 Copying Masters' Accounts.

You can start copying profitable traders by searching for their Social Profiles in the search engine. If you have a friend trading on the platform, you can copy their trades as well!

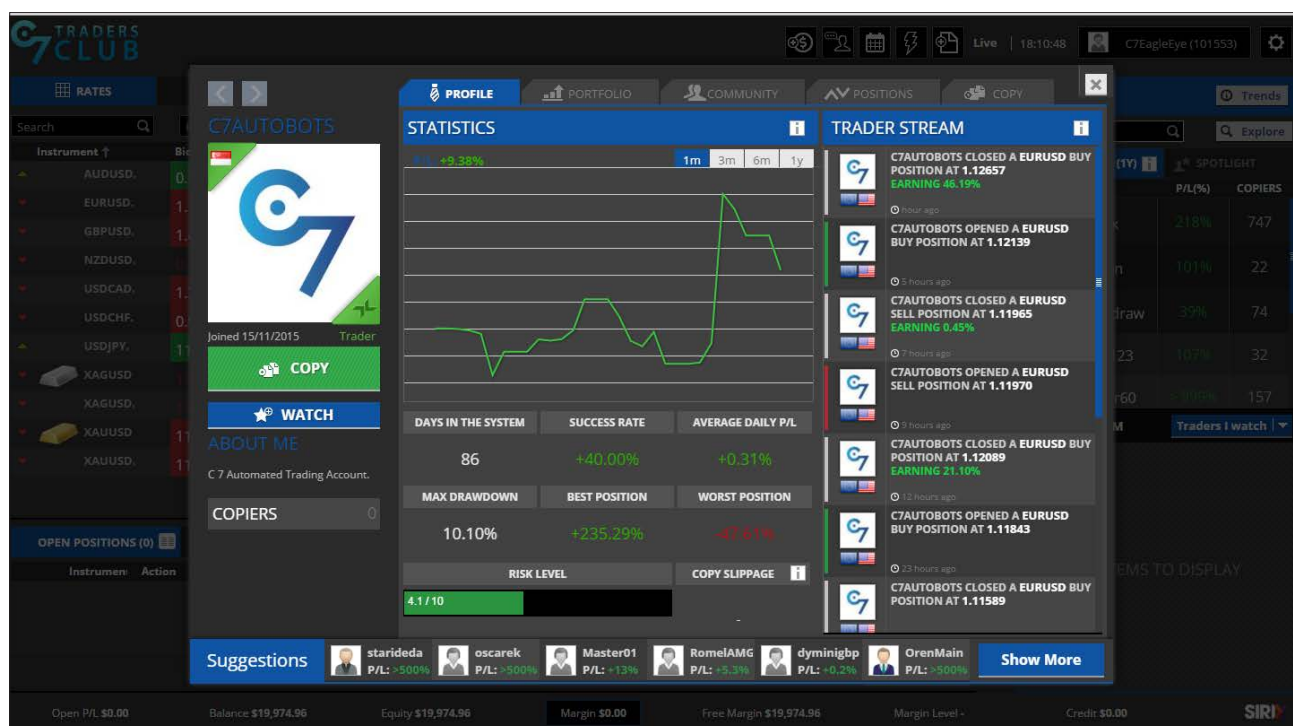

An alternative method to search for professional traders to copy is to use the leader board. The leader board refreshes daily and provides an easier selection for you to copy by ranking top performing traders within the community. We provide recommendations on masters to copy every Monday through our email blast. The weekly recommended masters are denoted with a star on the top left of their profile.

There are several premium accounts within the community which are hidden from the public. These premium masters set themselves apart with exceptional consistency and profitability. Copiers can choose to unlock these premium accounts and copy their trades for a certain amount of monthly service fee. To unlock these accounts, copiers will have to write in to support@c7traders.com.

Visit <https://www.c7traders.com/premium/#unlock-signal-providers> for more info.

For example, 'C7AutoBots' master account is hidden and can only be copied once the account is unhidden. Hence, you will not be able to search for it

STEP 5 Understanding Copy Trading.

Allocate Equity - The 'Allocate Equity' copy method lets you set aside a specific amount of equity for a master to automatically open up trades proportionately.

COPY TRADING

Positions that **vitorax** opens and closes will be automatically copied into your account.

Please select a copy method:

- ☒ Allocate equity 5000 \$ Equity
- ☐ Copy fixed-size positions 0.20 (lots) Size for each copied position

☐ Copy selected instruments only

Copy Slippage -0.31 pips

Copy Fixed Sized Positions - The 'Copy fixed-size positions' option lets you assign a specific fixed amount to a master trader.

COPY TRADING

Positions that **vitorax** opens and closes will be automatically copied into your account.

Please select a copy method:

- ☐ Allocate equity 5000 \$ Equity
- ☒ Copy fixed-size positions 1.00 (lots) Size for each copied position

☐ Copy selected instruments only

Tagging is successful when you see this slide. Positions will be opened and closed automatically when the master trades.

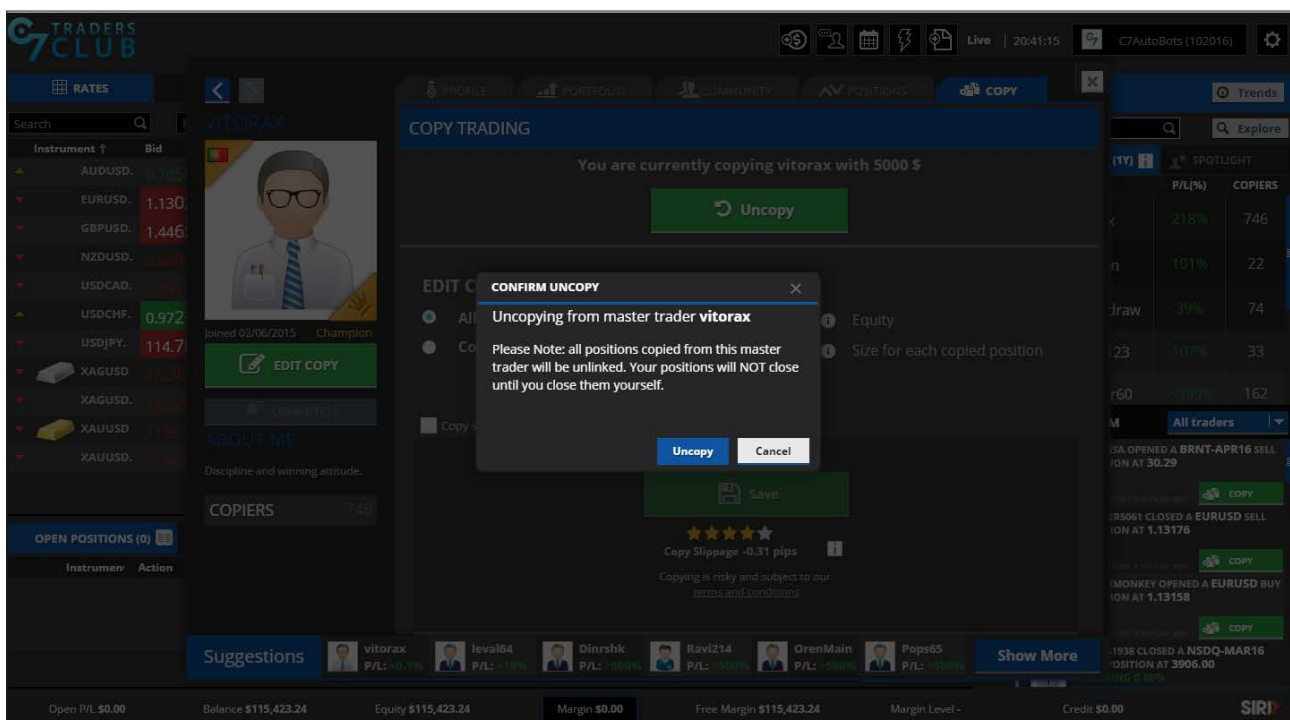

Once the account is tagged, you may make subsequent adjustments by going into your Social Profile and under 'Community', select 'Copying', and click on the 'Pencil' icon.

You can change the amount of allocated equity or amend the lot sizes for allocation of fixed size positions. Select 'Edit Copy' or 'Save' once you make the amendments.

You can also Uncopy the Master if you are unsatisfied with his performance. However, once you Uncopy the Master, all the current copied positions from him will be unlinked. This means that you will have to close it off manually yourself.

STEP 6 Monitor copied trades or start trading yourself!

You can monitor the master's trades on your home page under 'Open Positions', 'Copied From'.

The screenshot displays the 'OPEN POSITIONS (19)' tab. A table lists four open positions for GBPUSD and EURJPY. A red box highlights the 'Copied From' column, which shows the source trader's name (stoneco...) and buttons for 'Unlink' and 'i'. To the right, a sidebar shows a list of copied trades with details like 'POSITION AT 27.97', 'EARNING 60.05%', and 'COPY' buttons. At the bottom, account statistics are shown: Open P/L, Balance \$103,286.28, Equity \$104,930.63, Margin \$6,813.46, Free Margin \$98,117.16, Margin Level 1,540.05%, and Credit \$0.00.

You can also choose to perform your own trades along with copy trading. Hit the 'Sell' or 'Buy' button to place your own trades. Your positions will be synchronized with MT4 platform, as well as mobile.

The screenshot shows the 'EURUSD' chart with a 4-hour timeframe. The chart displays price movement with green and red candles. A 'SELL' button is highlighted at 1.13115 and a 'BUY' button at 1.13121. An 'EXECUTE ORDER RESULT' dialog box is open, showing the order was executed successfully at price 1.13101. The dialog box includes fields for Instrument (EURUSD), Action (Buy), Amount (0.01 Lot), and T/P (-). The background chart shows a price range from 1.07600 to 1.13200.
